

The

PHOENIX II

Phlebotomy Chair

THE PHOENIX II is a user-friendly phlebotomy chair that offers comfort, quality and durability all wrapped into a sleek European design. Continued advancements over its 35+ year history have helped to make the Phoenix II one of our most popular selling phlebotomy/apheresis chairs both here in North America and in Europe. The “either-side operation” of this manually operated chair allows the seat to be positioned anywhere along the chair's glide path from upright to Trendelenburg. The classic set of multi-positioning armrests will raise, lower, tilt and turn. They even move back allowing for easy ingress and egress.

STRUCTURE, COMFORT & SAFETY Heavy steel frame construction provides maximum strength and support for durability and decades of solid use. Front leg leveling pads and rear leg wheels allow for balance and easy movement. The upholstery consists of hi-grade comfort foam and premium medical grade vinyl in a variety of colors, all which meet the most stringent fire code and durability standards. Weight capacity 425 lbs./193 kg.

WARRANTY We include a lifetime warranty on the frame and a 3-year comprehensive warranty on parts and craftsmanship under normal use. This is the best in the industry!

Quick & Easy
Trendelenburg
Positioning

PHOENIX II

Phlebotomy Chair

THE PHOENIX II allows the donor to comfortably sit in a natural upright position while offering deep Trendelenburg positioning.

Smart engineering allows each of the three custom upholstery cushions to easily be replaced with the use of a single wrench.

EXTRAS

We include spare parts! Brake stop and brake pedal pads. Not that you will ever need them but it's always nice to know that you have extras.

NO ASSEMBLY REQUIRED

Each Phoenix II is thoroughly tested prior to shipping and comes completely assembled and ready to use.
