

Introducing
The

TECHNO

Reclining Phlebotomy Chair

Made in the USA

DESIGN MULTI-POSITIONING SEAT & ARMRESTS: The Techno can be optimized for specific uses, such as: phlebotomy (blood, plasma and platelet collection, apheresis), dialysis and infusion therapies. The Techno can be positioned anywhere from upright to horizontal to Trendelenburg and anywhere in between. The two armrest assemblies are removable allowing for easy lateral access from either side of the chair.

STRUCTURE, COMFORT & SAFETY Heavy gauge steel provides maximum strength and durability and years of reliable use. The Techno's comfortable upholstery consists of premium medical grade vinyl, hi-grade comfort foam, all which meet the most stringent fire code standards. The chair allows easy ingress and egress for the patient/donor at its lowest point of 20" and its ability to raise 7" which provides a much needed benefit to medical personnel by not having to compromise their physical health. In addition to its height adjustability, the Techno has removable armrest side-rails that allow access for wheelchair bound patients. In summary, the Techno provides the ultimate package providing a comfortable experience for the user and a safe work environment for the medical staff.

WEIGHT CAPACITY 475 pounds / 215 kilograms

WARRANTY We offer lifetime warranty on frame, a 3-year warranty against all manufactured parts & craftsmanship. The best in the industry!

All product designs are subject to change without notice.
